

Graham speaking at the London Stock Exchange Investor Forum

Surgical Innovations (SI) attended the London Stock Exchange Investor Forum at Eversheds in Leeds where Graham Bowland, CEO, presented our investment proposition to a selection of local Private Client Investment Managers.

The presentation included discussion of SI's upcoming product launches including the 3mm PretzelFlex™ and 3mm LogiCut™ scissor, which will both serve to strengthen SI's range of 'Ultra' minimally invasive surgery devices. The 3mm instruments offer patients faster recovery time and improved cosmesis (cosmetic appearance of scarring) by way of small incisions. Our expansion into new therapeutic markets in addition to other surgical disciplines via technology transfer was also discussed.

Investors even got an opportunity to view SI products in action with a video taken in surgery!
